

What is Astrix?

Astrix is a career assistant SaaS built to make the entire job search simpler, smarter, and more efficient. It brings job discovery, job-fit analysis, resume and cover letter tailoring, application assistance, and application tracking into one seamless workflow. Astrix helps you find opportunities that align with your skills, experience, career goals, and preferences, while AI analyzes each role to highlight what matters most. It then helps personalize your application using your genuine experience, without adding information that isn't true. Astrix also reduces the time spent on repetitive application tasks, allowing you to focus on the opportunities that matter. Every application can be organized and tracked in one place, giving you a clear view of your progress and what has been submitted. With Astrix, you stay in control while technology takes care of the time-consuming work—so you can spend less time managing applications and more time moving your career forward.

Frequently Asked Questions

1. What is Astrix?

Astrix is an AI-powered career assistant that helps you discover relevant jobs, understand your job fit, personalize your applications, and keep track of your job search—all from one place.

2. How does Astrix find jobs for me?

Astrix searches relevant job opportunities based on the preferences you provide, such as job title, location, salary range, experience, and work preferences.

3. Does Astrix customize my resume for every job?

Yes. Astrix analyzes the job description and helps highlight the most relevant skills and experience from your existing profile to create a more targeted application.

4. Will Astrix add skills or experience that I don't have?

No. Astrix is designed to work with your genuine information. It does not intentionally create false qualifications or invent work experience.

5. Can Astrix apply for jobs automatically?

Astrix can assist with and automate eligible parts of the application process, including repetitive form filling and document uploads, depending on the job platform and application requirements.

6. Can I control what Astrix applies to?

Yes. You can set your job preferences and application limits, review opportunities, and control your automation settings.

7. Can I see what was submitted?

Yes. Astrix keeps your application information organized so you can review the job, documents used, submission details, and application status where available.

8. Do I need to apply to every job myself?

No. Astrix is designed to reduce the repetitive work involved in applying. You can choose when and how much automation you want to use while keeping control of your job search.

9. Can I track my applications?

Yes. Astrix provides a centralized application dashboard where you can monitor applications and follow their progress.

10. Who is Astrix for?

Astrix is built for fresh graduates, experienced professionals, career switchers, active job seekers, and anyone who wants a more organized and efficient way to manage their job search.

Who is suitable for astrix?

Astrix is designed for job seekers who want a simpler and more efficient way to manage their search. It is suitable for fresh graduates starting their careers, experienced professionals exploring new opportunities, career switchers looking to move into new roles, and active job seekers managing multiple applications. Whether you're looking for your first job, a better opportunity, or a role that fits your experience and preferences, Astrix helps reduce the time spent on repetitive application tasks while keeping your job search organized.

Difference Between Astrix and other platforms?
